WEBSITE REDESIGN PROPOSAL

EWS PLUMBING & HEATING. A WEBSITE THAT GETS YOU THE JOB DETAILS.

PREPARED FOR	PREPARED BY	LIVE PREVIEW
EWS Plumbing & Heating, Inc.	Operator	3 working versions

01 SUMMARY

SUMMARY.

EWS has been a family-owned plumbing, heating and sheet metal contractor in Monson since 1976, with master licenses in Massachusetts, Connecticut and Vermont and Mass Save participation. The current website's forms collect no contact details, its email links are likely broken, and it gives two different figures for years in business.

We have already designed three working versions of a new ewsplumbingandheating.com, built from EWS's own content. Each one turns visitors into quote requests, commercial proposals and heat pump installs, makes EWS easy for Google and AI assistants to recommend, and works on a phone as well as on a computer. You choose the direction that fits, and we take it to launch.

PREPARED FOR EWS Plumbing & Heating, Inc., Monson, MA

02 WHERE TODAY'S SITE FALLS SHORT

WHERE TODAY'S SITE FALLS SHORT.

The current site has the right basics, but it loses customers before they call. We reviewed every page. These are the issues that matter most.

ISSUE	WHAT IT COSTS EWS
The quote and contact forms have no name, phone or email fields.	A customer can submit a request and you have no way to reach them.
The email links go to a different address than the one shown, with a hidden character.	Customers who try to email likely get an error and give up.
The site says 'over 50 years' on one page and 'over 30 years' on another.	Mixed numbers make customers question the rest of the site.
No office hours, no towns served, and a 'Schedule Appt' button with no scheduling.	Customers can't tell if you work in their town or when to call.
No FAQ, no structured data, and image descriptions that are file names.	Google and AI assistants can't read what EWS does or where, so they recommend someone else.

03 THREE DIRECTIONS TO CHOOSE FROM

THREE DIRECTIONS TO CHOOSE FROM.

Each version presents EWS as a different kind of business, modeled on the best plumbing, heating and air conditioning websites in that part of the trade. All three use EWS's real services, history and contact details, and every one works on a phone. View them side by side here: EWS website preview.

VERSION	LEADS WITH	BEST IF EWS WANTS TO GROW	KEY FEATURE
1. Family	Two master-licensed generations since 1976	Residential and light commercial quotes	A 5-step quote request with service-area check and review step
2. Commercial	Commercial mechanical and rooftop unit service	Maintenance agreements and commercial projects	A 6-step proposal request with file upload and review step
3. Heat Pumps	Heat pumps and heating, Mass Save paperwork handled	Heat pump, boiler and water heater installs	A 5-step heat pump estimate request with optional system photo

You can also mix them. For example, the Commercial proposal form can sit on the business page of the Family site.

04 WHY THE NEW SITE WORKS BETTER

WHY THE NEW SITE WORKS BETTER.

Every change answers a problem on the current site, and all of it comes with whichever version EWS picks.

A Found and recommended by Google and AI assistants

More customers now ask an AI assistant, or read Google's AI answer, before they call anyone: "Who installs ductless heat pumps through Mass Save near Monson, Massachusetts?" Those tools recommend businesses whose facts they can read and check. The new site is built to be read.

TODAY	NEW SITE	WHAT IT MEANS FOR EWS
Search tools see 'Residential & Commercial Plumbing' and little else.	One consistent set of facts: services, licenses, service area and Mass Save status in the structured format search engines and AI tools read.	Google and AI assistants get EWS's facts directly and accurately.
No FAQ anywhere on the site.	Plain-English answers to the questions customers ask, from heat pumps to rooftop units to licenses.	When someone asks, EWS has a clear answer ready to be quoted.
Master licenses in three states sit in a paragraph on the About page.	They lead the proof on every version and are built into the site's structure.	What sets EWS apart is what gets surfaced.

No one can promise a ranking or a mention in an AI answer. What we can do is make EWS the easiest local plumbing, heating and sheet metal contractor for search engines and AI tools to read, verify and recommend.

B Easier for customers, and for the office

TODAY	NEW SITE	WHAT IT MEANS FOR EWS
Forms that send only a dropdown choice.	A short request on every version with the job, the address and a name and phone. Each version adapts it to a home quote, a commercial proposal or a heat pump estimate.	Every web lead arrives with what the office needs to call back.
Homes, businesses and rooftop units on separate thin pages.	Each version starts from the visitor's situation: their home, their building or their heating system.	Visitors reach the right service in a tap.
One testimonial in a carousel next to a stock photo.	Deb's review placed where it helps, real team and job photos, and a Google review link.	More reviews over time, where customers look before they call.

C Built to a high standard

- **Phone first.** Designed for the phone, then the computer, with call and request always within reach of a thumb.
- **Fast and accessible.** Lightweight pages that load quickly on a weak cell signal, with clear headings and labeled forms that work for every customer and every search tool.

- **Made to last.** Clean, standard code that can grow with EWS: new services, town pages or seasonal offers.

05 WHY OPERATOR

WHY OPERATOR.

Most small-business sites are page-builder templates that an agency sets up and leaves. They look dated within a few years, load slowly on phones, and were never built for AI search. Every Operator site is designed and coded for one business. You also see the work before you commit: three working versions already exist.

WHAT YOU GET	TYPICAL AGENCY TEMPLATE SITE	OPERATOR
Design	A template shared with other businesses	Designed for EWS alone
Build	A CMS page builder stacked with plugins	Custom code, nothing extra to load
Speed	Heavy scripts that drag on a phone	Fast on a weak cell signal
AI search	Not considered	Built in from day one
Local SEO	Generic page structure	Structured for local search and every service
Phones	A desktop layout squeezed down	Designed for the phone first
Upkeep	Plugin updates and security patches	No plugins to patch

- **Custom design.** Built from EWS's trade, customers and history, with one consistent brand, look and voice on every page.
- **Custom code.** Hand-built, lightweight pages with no page builder and nothing slowing them down.
- **Optimized for AI and AI search.** Structured facts and quotable answers that Google and AI assistants can read, check and recommend.
- **Better SEO and information architecture.** Organized around the customer's problem, with real headings and service content laid out the way search engines read local businesses.

- **Modern UI for 2027 and beyond.** A phone-first interface with the polish customers expect from the apps they use every day.

Waiting has a cost too. Every day the current forms take requests with no way to call the customer back. The new site fixes that from launch day.

06 WHAT'S INCLUDED

WHAT'S INCLUDED.

- The finished site in the direction EWS picks, with your edits and any features you want to borrow from the other two.
- Quote, proposal and estimate forms that send the customer's name, phone, address and job details to your office.
- Every page built for phones first, with your number one tap away.
- Search and AI-assistant setup, so Google and AI tools can read EWS's services, licenses, service area and answers.
- Clean-up of today's issues: the broken email links, mixed years, empty forms, stock photo and typos.
- Residential, commercial, rooftop unit, Mass Save and careers sections.
- Launch on your existing domain, ewsplumbingandheating.com.
- First 2 months of support after launch, included: bug fixes, launch help and small corrections.

HOW IT WORKS.

Because the design is already done, EWS goes straight to choosing and refining.

TIMELINE	About 4 weeks from approval, once we have your content and access

01	**Choose a direction.** EWS picks one of the three versions, or a mix.
02	**Fill in the details.** We confirm your office hours, your after-hours and emergency policy, which email address is live, the license numbers you want shown, your mailing address, the towns you serve and your Google rating with you.
03	**Refine.** We adjust wording, colors and features until it feels like EWS.
04	**Connect.** Forms go to your office, and your Google listing is linked.
05	**Launch.** The new site goes live on your domain, checked page by page on phone and desktop.
06	**Support.** The first two months after launch are included. After that, choose Operator Care at $250 a month, or a full handoff of the site, code and domain.

INVESTMENT.

Most customers look at a contractor's website before they call. The new EWS site is designed to make that look easy: clear services, real proof and a simple way to reach you. One fixed price, no long contract, and you own everything.

ITEM	PRICE
Website design, build and launch (one time). About 9 pages: home, residential, heat pumps and Mass Save, commercial, rooftop units, about the family, careers, service area, and contact, covering three states.	$5,000
Launch offer: 10% off, for our first clients only	–$500
Your price	**$4,500**
Support for the first two months after launch (Launch offer)	Included

+ After the first two months: optional Operator Care, or handoff

Care is optional and month to month. If you would rather run the site yourself, we hand over the site, its code and your domain after the first two months. Either way they stay in your name, and hosting and domain are billed at cost in your own accounts.

PLAN	WHAT IT COVERS	MONTHLY
Operator Care	Hosting management, form and uptime checks, fixes and small text updates. No unlimited changes; larger work is quoted first.	$250

If you keep care after the first two months, year one totals $7,000: $4,500 for the site plus $2,500 for ten months of care, with hosting and domain at cost on top. New pages and larger changes are quoted separately.

PAYMENT TERMS	$2,250 to start, $2,250 before launch
VALID UNTIL	November 30, 2026

NEXT STEPS.

01 Click through the three versions and tell us which one feels most like EWS.

02 Approve this proposal by replying to the email it came with, or by signing below.

03 Send us your office hours, the email address you want customers to use, your after-hours policy, a list of towns you serve, and any project photos with a line about each job.

We'll start refining the version you choose as soon as we hear back.
