WEBSITE REDESIGN PROPOSAL

VIS PLUMBING & HEATING. A WEBSITE THAT BOOKS THE JOB.

PREPARED FOR	PREPARED BY	LIVE PREVIEW
VIS Plumbing & Heating	Operator	3 working versions

01 SUMMARY

SUMMARY.

VIS has served Southeast Minnesota and Northeast Iowa since 1965, with five septic certifications, geothermal and boiler work and a stocked 4,900 sq ft building. The current website says 'over 50 years', has no email address, and shows undated offers.

We have already designed three working versions of a new visplumbingheating.com, built from VIS's own content. Each one turns visitors into service calls, septic jobs and maintenance sign-ups, makes VIS easy for Google and AI assistants to recommend, and works on a phone as well as on a computer. You choose the direction that fits, and we take it to launch.

PREPARED FOR VIS Plumbing & Heating, Lanesboro, MN

02 WHERE TODAY'S SITE FALLS SHORT

WHERE TODAY'S SITE FALLS SHORT.

The current site has the right basics, but it loses customers before they call. We reviewed every page. These are the issues that matter most.

ISSUE	WHAT IT COSTS VIS
'Over 50 years' when you've been in business since 1965.	You undersell more than a decade of history.
No email address anywhere on the site.	Customers who want to write first move on.
Home-page offers have no dates and aren't on the Promotions page.	Customers can't tell if the deals are real.
Rushford and Harmony are listed as locations with no addresses.	Customers don't know where to go or which number to call.
No FAQ, structured data or image descriptions, and a one-line meta description.	Google and AI assistants can't read what VIS does or where, so they recommend someone else.

03 THREE DIRECTIONS TO CHOOSE FROM

THREE DIRECTIONS TO CHOOSE FROM.

Each version presents VIS as a different kind of business, modeled on the best plumbing, heating and septic websites in that part of the trade. All three use VIS's real services, history and contact details, and every one works on a phone. View them side by side here: VIS website preview.

VERSION	LEADS WITH	BEST IF VIS WANTS TO GROW	KEY FEATURE
1. Root River	Bluff Country's hometown crew since 1965	Service calls across the valley	A Root River trail-style map with each town's number
2. Five Certifications	Five septic certifications, one local crew	Septic, water treatment and rural heating work	A septic cross-section that lights up for each certification
3. Know Before You Call	Check the simple things, then call us	HVAC service, maintenance and replacements	An interactive troubleshooting checker that pre-fills the request

You can also mix them. For example, the Know Before You Call checker can sit on the heating page of the Root River site.

04 WHY THE NEW SITE WORKS BETTER

WHY THE NEW SITE WORKS BETTER.

Every change answers a problem on the current site, and all of it comes with whichever version VIS picks.

A Found and recommended by Google and AI assistants

More customers now ask an AI assistant, or read Google's AI answer, before they call anyone: "Who does septic inspections near Lanesboro, Minnesota?" Those tools recommend businesses whose facts they can read and check. The new site is built to be read.

TODAY	NEW SITE	WHAT IT MEANS FOR VIS
Search tools find 'Local and Trusted!' and little else.	One consistent set of facts: services, towns, certifications and hours in the structured format search engines and AI tools read.	Google and AI assistants get VIS's facts directly and accurately.
No FAQ anywhere on the site.	Plain-English answers to the questions customers ask, from septic to softeners to furnaces.	When someone asks, VIS has a clear answer ready to be quoted.
Your five septic certifications are a line of text.	They lead their own section and are built into the site's structure.	What sets VIS apart is what gets surfaced.

No one can promise a ranking or a mention in an AI answer. What we can do is make VIS the easiest local plumbing, heating and septic contractor for search engines and AI tools to read, verify and recommend.

B Easier for customers, and for the office

TODAY	NEW SITE	WHAT IT MEANS FOR VIS
A service form that doesn't say what happens next.	A short request on every version: the problem, the property type, then name and phone. Each version adapts it to home service, septic or a stopped furnace.	Every web lead arrives with what the office needs to call back.
Troubleshooting checklists as long pages of text.	Each version starts from the customer's situation: their town, their system, or what just stopped working.	Customers reach the right service in a tap.
Four testimonials on their own page.	Testimonials placed where they help, with a Google review link.	More reviews over time, where homeowners look before they call.

C Built to a high standard

- **Phone first.** Designed for the phone, then the computer, with call and request always within reach of a thumb.
- **Fast and accessible.** Lightweight pages that load quickly on a weak cell signal, with clear headings and labeled forms that work for every customer and every search tool.
- **Made to last.** Clean, standard code that can grow with VIS: new services, town pages or seasonal offers.

WHY OPERATOR.

Most small-business sites are page-builder templates that an agency sets up and leaves. They look dated within a few years, load slowly on phones, and were never built for AI search. Every Operator site is designed and coded for one business. You also see the work before you commit: three working versions already exist.

WHAT YOU GET	TYPICAL AGENCY TEMPLATE SITE	OPERATOR
Design	A template shared with other businesses	Designed for VIS alone
Build	A CMS page builder stacked with plugins	Custom code, nothing extra to load
Speed	Heavy scripts that drag on a phone	Fast on a weak cell signal
AI search	Not considered	Built in from day one
Local SEO	Generic page structure	Structured for local search and every service
Phones	A desktop layout squeezed down	Designed for the phone first
Upkeep	Plugin updates and security patches	No plugins to patch

- **Custom design.** Built from VIS's trade, customers and history, with one consistent brand, look and voice on every page.
- **Custom code.** Hand-built, lightweight pages with no page builder and nothing slowing them down.
- **Optimized for AI and AI search.** Structured facts and quotable answers that Google and AI assistants can read, check and recommend.
- **Better SEO and information architecture.** Organized around the customer's problem, with real headings and service content laid out the way search engines read local businesses.
- **Modern UI for 2027 and beyond.** A phone-first interface with the polish customers expect from the apps they use every day.

Waiting has a cost too. Every day the current site undersells your history and offers deals nobody can date. The new site fixes that from launch day.

WHAT’S INCLUDED.

- The finished site in the direction VIS picks, with your edits and any features you want to borrow from the other two.
- Service request forms that send the customer's name, phone, property type and problem to your office.
- Every page built for phones first, with both numbers one tap away.
- Search and AI-assistant setup, so Google and AI tools can read VIS's services, towns, certifications and answers.
- Clean-up of today's issues: the stale years, undated offers, missing email and typos.
- History, septic, water treatment, maintenance and careers sections.
- Launch on your existing domain, visplumbingheating.com.
- First 2 months of support after launch, included: bug fixes, launch help and small corrections.

HOW IT WORKS.

Because the design is already done, VIS goes straight to choosing and refining.

TIMELINE	About 4 weeks from approval, once we have your content and access

01 **Choose a direction.** VIS picks one of the three versions, or a mix.

02 **Fill in the details.** We confirm an email address, your after-hours policy, whether Rushford and Harmony are offices or service towns, your current offers, your legal name and your Google rating with you.

03 **Refine.** We adjust wording, colors and features until it feels like VIS.

04 **Connect.** Forms go to your office, and your Google listing is linked.

05 **Launch.** The new site goes live on your domain, checked page by page on phone and desktop.

06 **Support.** The first two months after launch are included. After that, choose Operator Care at $250 a month, or a full handoff of the site, code and domain.

INVESTMENT.

Most customers look at a contractor's website before they call. The new VIS site is designed to make that look easy: clear services, real proof and a simple way to reach you. One fixed price, no long contract, and you own everything.

ITEM	PRICE
Website design, build and launch (one time). About 8 pages: home, plumbing, heating and cooling, septic, water treatment, maintenance, about the shop, and contact.	$4,500
Launch offer: 10% off, for our first clients only	–$450
Your price	**$4,050**
Support for the first two months after launch (Launch offer)	Included

+ After the first two months: optional Operator Care, or handoff

Care is optional and month to month. If you would rather run the site yourself, we hand over the site, its code and your domain after the first two months. Either way they stay in your name, and hosting and domain are billed at cost in your own accounts.

PLAN	WHAT IT COVERS	MONTHLY
Operator Care	Hosting management, form and uptime checks, fixes and small text updates. No unlimited changes; larger work is quoted first.	$250

If you keep care after the first two months, year one totals $6,550: $4,050 for the site plus $2,500 for ten months of care, with hosting and domain at cost on top. New pages and larger changes are quoted separately.

PAYMENT TERMS	$2,025 to start, $2,025 before launch
VALID UNTIL	November 30, 2026

NEXT STEPS.

01 Click through the three versions and tell us which one feels most like VIS.

02 Approve this proposal by replying to the email it came with, or by signing below.

03 Send us an email address, your after-hours policy, current offers, and photos of the crew, trucks, shop and jobs, plus any other archival photos.

We'll start refining the version you choose as soon as we hear back.
