WEBSITE REDESIGN PROPOSAL

WILL'S PLUMBING & HEATING. A WEBSITE THAT BOOKS THE JOB.

PREPARED FOR	PREPARED BY	LIVE PREVIEW
Will's Plumbing & Heating, Inc	Operator	3 working versions

01 SUMMARY

SUMMARY.

Will's is a five-person Riverton crew led by Master Plumber Will Goehring, in business since 2004, with boiler and in-floor heat skills and a phone number people remember. The current website can't be called from a phone, mixes up its years, and still carries template copy.

We have already designed three working versions of a new willsplumbingheating.com, built from Will's's own content. Each one turns visitors into service calls and heating jobs, makes Will's easy for Google and AI assistants to recommend, and works on a phone as well as on a computer. You choose the direction that fits, and we take it to launch.

PREPARED FOR Will Goehring, Will's Plumbing & Heating, Inc, Riverton, WY

02 WHERE TODAY'S SITE FALLS SHORT

WHERE TODAY'S SITE FALLS SHORT.

The current site has the right basics, but it loses customers before they call. We reviewed every page. These are the issues that matter most.

ISSUE	WHAT IT COSTS WILL'S
The phone number appears three ways and none of them can be tapped to call.	Phone visitors have to copy the number by hand, and many won't.
Years read 30, 30+, over 20 and since 2004 on different pages.	Mixed numbers make customers wonder which is true.
Template copy like 'Our Services Empower Your Brand' and a 98% stat with no source.	The site reads as unfinished to every customer who scrolls.
No contact form, no map and no reviews.	Customers who don't want to call have nowhere to go.
No structured data, missing image descriptions, and in-floor heating missing from Services.	Google and AI assistants can't read what Will's does or where, so they recommend someone else.

03 THREE DIRECTIONS TO CHOOSE FROM

THREE DIRECTIONS TO CHOOSE FROM.

Each version presents Will's as a different kind of business, modeled on the best plumbing and heating websites in that part of the trade. All three use Will's's real services, history and contact details, and every one works on a phone. View them side by side here: Will's website preview.

VERSION	LEADS WITH	BEST IF WILL'S WANTS TO GROW	KEY FEATURE
1. 463-LEAK	The number you can't forget	Service and leak calls	A keypad hero that spells 463-LEAK and a meter test for hidden leaks
2. Wind River Heat	Boilers and in-floor heat for long Wyoming winters	Boiler, radiant and water heater jobs	A hydronic zone board that shows warm water running to each floor
3. The Crew	Five people, one Riverton crew	Trust-led service and repeat customers	A crew board and a step-by-step warranty

You can also mix them. For example, the Wind River Heat zone board can sit on the heating page of the 463-LEAK site.

04 WHY THE NEW SITE WORKS BETTER

WHY THE NEW SITE WORKS BETTER.

Every change answers a problem on the current site, and all of it comes with whichever version Will's picks.

A Found and recommended by Google and AI assistants

More customers now ask an AI assistant, or read Google's AI answer, before they call anyone: "Who installs in-floor heating near Riverton, Wyoming?" Those tools recommend businesses whose facts they can read and check. The new site is built to be read.

TODAY	NEW SITE	WHAT IT MEANS FOR WILL'S
Search tools find mixed years, an unclickable number and no structured data.	One consistent set of facts: services, hours, area and warranty in the structured format search engines and AI tools read.	Google and AI assistants get Will's facts directly and accurately.

TODAY	NEW SITE	WHAT IT MEANS FOR WILL'S
No FAQ anywhere on the site.	Plain-English answers to the questions customers ask, from hidden leaks to boilers to the warranty.	When someone asks, Will's has a clear answer ready to be quoted.
Boilers, in-floor heat and Navien certification are a line of text.	They lead their own sections and are built into the site's structure.	What sets Will's apart is what gets surfaced.

No one can promise a ranking or a mention in an AI answer. What we can do is make Will's the easiest local plumbing and heating company for search engines and AI tools to read, verify and recommend.

B Easier for customers, and for the office

TODAY	NEW SITE	WHAT IT MEANS FOR WILL'S
No form: visitors have to call or copy an email address.	A short request on every version: the problem, then name, phone and email. Each version adapts it to service calls, heating or meeting the crew.	Every web lead arrives with what the office needs to call back.
Visitors have to know which page their problem belongs on.	Each version starts from the customer's situation: a leak right now, a cold house, or who's coming over.	Customers reach the right service in a tap.
No reviews or Google link anywhere.	A reviews section ready for your Google reviews, with a link to leave one.	More reviews over time, where homeowners look before they call.

C Built to a high standard

- **Phone first.** Designed for the phone, then the computer, with call and request always within reach of a thumb.
- **Fast and accessible.** Lightweight pages that load quickly on a weak cell signal, with clear headings and labeled forms that work for every customer and every search tool.
- **Made to last.** Clean, standard code that can grow with Will's: new services, town pages or seasonal offers.

WHY OPERATOR.

Most small-business sites are page-builder templates that an agency sets up and leaves. They look dated within a few years, load slowly on phones, and were never built for AI search. Every Operator site is designed and coded for one business. You also see the work before you commit: three working versions already exist.

WHAT YOU GET	TYPICAL AGENCY TEMPLATE SITE	OPERATOR
Design	A template shared with other businesses	Designed for Will's alone
Build	A CMS page builder stacked with plugins	Custom code, nothing extra to load
Speed	Heavy scripts that drag on a phone	Fast on a weak cell signal
AI search	Not considered	Built in from day one
Local SEO	Generic page structure	Structured for local search and every service
Phones	A desktop layout squeezed down	Designed for the phone first
Upkeep	Plugin updates and security patches	No plugins to patch

- **Custom design.** Built from Will's's trade, customers and history, with one consistent brand, look and voice on every page.
- **Custom code.** Hand-built, lightweight pages with no page builder and nothing slowing them down.
- **Optimized for AI and AI search.** Structured facts and quotable answers that Google and AI assistants can read, check and recommend.
- **Better SEO and information architecture.** Organized around the customer's problem, with real headings and service content laid out the way search engines read local businesses.
- **Modern UI for 2027 and beyond.** A phone-first interface with the polish customers expect from the apps they use every day.

Waiting has a cost too. Every day a phone visitor finds the current site, they can't tap your number to call. The new site fixes that from launch day.

WHAT'S INCLUDED.

- The finished site in the direction Will's picks, with your edits and any features you want to borrow from the other two.
- Contact forms that send the customer's name, phone, email and problem to your office.
- Every page built for phones first, with 307-463-LEAK one tap away.
- Search and AI-assistant setup, so Google and AI tools can read Will's services, area and answers.
- Clean-up of today's issues: the mixed years, template copy, unsourced stat and missing services.
- Crew, warranty, service area and reviews sections.
- Launch on your existing domain, willsplumbingheating.com.
- First 2 months of support after launch, included: bug fixes, launch help and small corrections.

HOW IT WORKS.

Because the design is already done, Will's goes straight to choosing and refining.

TIMELINE	About 3 weeks from approval, once we have your content and access

01	**Choose a direction.** Will's picks one of the three versions, or a mix.
02	**Fill in the details.** We confirm your license number, the towns inside your 50-mile radius, your Google review link and which job photos are yours with you.
03	**Refine.** We adjust wording, colors and features until it feels like Will's.
04	**Connect.** Forms go to your office, and your Google listing is linked.
05	**Launch.** The new site goes live on your domain, checked page by page on phone and desktop.
06	**Support.** The first two months after launch are included. After that, choose Operator Care at $250 a month, or a full handoff of the site, code and domain.

INVESTMENT.

Most customers look at a contractor’s website before they call. The new Will's site is designed to make that look easy: clear services, real proof and a simple way to reach you. One fixed price, no long contract, and you own everything.

ITEM	PRICE
Website design, build and launch (one time). A focused 5 page site: home, plumbing and water heaters, boilers and in-floor heat, the crew, and contact.	$3,000
Launch offer: 10% off, for our first clients only	–$300
Your price	**$2,700**
Support for the first two months after launch (Launch offer)	Included

+ After the first two months: optional Operator Care, or handoff

Care is optional and month to month. If you would rather run the site yourself, we hand over the site, its code and your domain after the first two months. Either way they stay in your name, and hosting and domain are billed at cost in your own accounts.

PLAN	WHAT IT COVERS	MONTHLY
Operator Care	Hosting management, form and uptime checks, fixes and small text updates. No unlimited changes; larger work is quoted first.	$250

If you keep care after the first two months, year one totals $5,200: $2,700 for the site plus $2,500 for ten months of care, with hosting and domain at cost on top. New pages and larger changes are quoted separately.

PAYMENT TERMS	$1,350 to start, $1,350 before launch
VALID UNTIL	November 30, 2026

NEXT STEPS.

01 Click through the three versions and tell us which one feels most like Will's.

02 Approve this proposal by replying to the email it came with, or by signing below.

03 Send us your license number, the towns you serve most, your Google review link, and more photos of the crew, trucks and finished jobs.

We'll start refining the version you choose as soon as we hear back.
